Assignment - Chapter 1

You have been provided a form. You will write the validations to make sure that all of the form values are valid.

You will write your validations in the same form as the examples in `student.js`, and you will write them into `student.js`

Valid Form Values

First Name must not be blank
Last Name must not be blank
Email must not be blank
Password and PasswordConfirm must match, and neither may be blank
Dream must be present
Email must be a valid email address

If provided, Phone Number must have the correct format

Tools

`is_empty` returns true if the value is blank
`is_phone_number` returns true if the value is the a phone number
`is_email` returns true if the value is a valid email
`is_ben` returns true if the value is "Ben"

Code as Literature

Please feel free to look through any of the provided code
We will not cover the contents of `validate.js` during the first chapter sessions.
